Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/540,862	Applicant(s) NISHIMURA ET AL.	
	Examiner JANE RHEE	Art Unit 1795	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Rejections Repeated

1. The 35 U.S.C. Double Patenting rejection of claims 1,8-13,16 over copending application 10540867 has been repeated as previously made in office action 10/17/07.
2. The 35 U.S.C. 103(a) rejection of claims 1,5-16 unpatentable over Takatani et al. in view of Thibault et al. has been repeated as previously made in office action 10/17/07.

Response to Arguments

3. Applicant's arguments filed 1/17/08 have been fully considered but they are not persuasive.

In response to applicant's argument that neither Takatani or Thibault discloses the insulating area of the first and second current collectors on the second and first sides respectively, Thibault teaches that the first and second current collectors have insulating layers attached in a face to face relationship, (paragraph 0149) however, even though the insulating layers are attached parallel to the current collectors, the left and right side of the insulating layers are still positioned on the first and second side because the insulating layers adhered and cover the entire parallel surface of the current collectors thus being visible from the first and second side.

In response to applicant's argument that Thibault says nothing about having an insulating layer with an edge that protrudes on a side face opposite to the edge having the protruding current collector sheet as disclosed in figure 1, applicant did not claim that the insulating layer protrudes on a side face as depicted in figure 1.

In response to applicant's argument that Takatani does not disclose that PTC device is positioned on a first or second side face, even though PTC element is parallel, the PTC element is still positioned on the first and second side because the PTC element is adhered and cover the entire parallel surface of the current collectors thus being visible from the first and second side.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
